Alcon is a professional business house having multiple verticals such as manufacturing, construction and real estate, trading, hospitality and logistics. Mr. Atul Bapat of CATS Academy India Pvt. Ltd. assisted us in deliberating and defining a strategic framework for our company, for its journey to excellence. He conducted a very structured VMV workshop, wherein the core leadership team of ALCON was involved in multiple moderated brainstorming sessions, supported by practical illustrations and comprehensive and clear formats, so as to arrive at a consensus. At the end of the workshop we had defined our VMV framework and long term goals, for the group as well as individual companies. It was followed by a 'change management' workshop wherein the team discussed, debated, identified the focus areas and narrowed down on most powerful actions to be completed in the coming months.

Atul's programs are very structured and with concrete deliverables at the end of the program. He is very persistent and does not stop till the deliverables are delivered. We are extremely happy to have him as a partner in our journey to excellence.
