

Hyland

Date: 16 December 2022

TO WHOEVER IT MAY CONCERN

The Agility Enablement community at Hyland Software, Kolkata, comprising of 13 members, attended a two-day Leadership Training & Experiential Learning program on the 14th & 15th Nov 2022 at the Northpoint Centre of Learning, Khandala. The training was arranged and conducted by CATS Academy, Pune and was tailored to meet our expectations.

The training consisted of both classroom and outdoor activities that involved the entire group, sometimes divided into teams. It helped us learn the concepts of Leadership in a hands-on and fun manner, keeping all of us engaged and excited. It also instilled a positive competitive mentality among us while we played different team games that were conducted in a structured and professional way. The trainers were knowledgeable and articulated the leadership concepts effectively. The support staff were equally competent and handled the arrangement and execution of the activities nicely.

In addition to the aforesaid training, CATS Academy had been extremely helpful from the time we landed at the Pune airport till we left for Kolkata. Arrangement of transport and accommodation at Northpoint during our stay at Khandala had been excellent and commendable. We sincerely appreciate the gesture of CATS Academy for engaging Divya & Rutuja to guide and help our group, during our transit between Pune and Khandala.

We would like to specially thank Atul Bapat, Managing Director of CATS Academy, for the awesome collaboration we had from the very beginning. He had been extremely patient and understanding of our training requirements, as well our comfort during our stay at Khandala. He had conducted and supervised the entire training himself in the most efficient manner. We acknowledge his engagement at all stages.

We express our desire to be a part of more such trainings offered by CATS Academy, in future. We wish them the very best in all their future engagements.

Thanking you.
