Date : 17<sup>th</sup> February, 2022

Nikhtish Engineering Pvt. Ltd. is a manufacturing company engaged in design, development, manufacturing and testing of niche NBC Filtration Systems. We supply to Defense, our majority of production is exported to countries such as Israel.

We are associated with CATS Academy India Pvt. Ltd. since more than a year. As our Strategic Business Partner, CATS Academy handles our entire functions of HR, IR and Admin Department.

CATS Academy India has done a wonderful job on setting up sound HR processes and systems and we are already witnessing various benefits. We are happy to receive guidance from their top management particularly Mr. Atul Bapat and Dr. Rajendra Sabnis.

We appreciate the dedication of Mr. R.K Modve from CATS who is full-time associated with us and handles all day-to-day functions with little involvement of our directors. CATS Academy as a company is very dependable, professional, and customer oriented. The value provided by them is unbelievable especially the expertise of Dr. Sabnis, and Ms. Ruhee Kaul.

I am glad we took the decision of outsourcing our entire HR, IR and Admin function to the competent and efficient team of CATS Academy. In nutshell with the HR Partnership of CATS Academy, they have taken away all our worries and concerns related to people issues. I find their services - good value for money.

We would highly recommend CATS Academy to all SMEs that wish to professionalize their HR operations adding considerable value to the business success.

I wish CATS Academy continue with their core purpose of making positive difference to organizations and individuals.

Regards,

  
Nikhil Topkar  
Director
